

AKSHAY R K

SENIOR FULL STACK DEVELOPER • RUPPINER CHAUSSEE 211, BERLIN, 13503, GERMANY

DETAILS

Ruppiner Chaussee 211, Berlin,
13503, Germany
akshayrrr18@gmail.com

SKILLS

TypeScript, JavaScript, Python, SQL

React, Next.js, Tailwind CSS,
Bootstrap, HTML, CSS

Node.js, FastAPI, Django, Express,
REST APIs

PostgreSQL, MySQL, Redis,
DynamoDB, MongoDB

AWS, Docker, Terraform, GitHub
Actions, CI/CD

LangChain, OpenAI API, RAG
Pipelines, Vector Databases
(Pinecone, Chroma), LLM
Orchestration, Generative AI
Integration, Claude Code, GitHub
Copilot, Cursor (AI-augmented
development)

Jest, Mocha, Unit & Integration
Testing

GDPR, OAuth2, Encryption,
Authentication Middleware, Secure
API Design

PROFILE

Senior Full stack Engineer / Lead Software Engineer with 7 years of experience building scalable SaaS and B2C platforms using Next.js, React, TypeScript, and modern backend frameworks (Node.js, Python) . Skilled in developing end-to-end user experiences, improving performance, and maintaining clean, testable, and reliable systems. Experienced in AI-assisted software engineering (Claude Code, Copilot, Cursor) to accelerate feature development and enhance code quality. Passionate about creating intuitive digital experiences that connect people with meaningful opportunities.

EMPLOYMENT HISTORY

Lead Engineer at Stellantis India Private Limited, Bengaluru

September 2025 — Present

- Designed and maintained Next.js + TypeScript applications, improving internal user flows and responsiveness.
- Architected and deployed Node.js + FastAPI backend services handling data pipelines and event-driven integrations.
- Integrated AI-assisted development tools (Claude Code, Copilot, Cursor) to generate test cases, refactor code, and document APIs.
- Led sprint planning and mentored engineers on debugging, testing, and performance optimization.
- Reduced bug count by 30% through improved CI/CD and monitoring pipelines.
- Collaborated with cross-functional teams (Design, Product, QA) to deliver customer-facing features with high reliability.

Lead Software Engineer at Akkodis India Pvt Ltd. (Client Stellantis), Bengaluru

November 2023 — September 2025

- Built full-stack modules using React, Next.js, TypeScript, and integrated them with backend APIs.
- Worked on SQL and REST API integrations for job and vehicle data visualization dashboards.
- Automated test generation and documentation using Claude Code and Copilot.
- Conducted code reviews and mentored developers on front-end architecture and TDD practices.
- Modernized legacy modules into reusable React components, improving maintainability by 40%.
- Solved complex UX and data-flow issues by performing root-cause analysis, improving user journeys, and reducing escalations by 40%.

Lead Software Developer at BLP Industry.AI, Bengaluru

September 2020 — October 2023

- Developed Conserve.AI, a cloud-based analytics platform using React, TypeScript, Node.js, and PostgreSQL.
- Implemented end-to-end pipelines for data ingestion, storage, and visualization.
- Deployed Next.js for SSR and SEO optimization, improving web app load time by 45%.

- Created internal monitoring dashboards with Grafana and integrated CI/CD for continuous deployment.
- Collaborated with cross-functional teams to prioritize and deliver features on time.

Senior Developer at Montaigne Smart Business Solutions, Hyderabad

March 2019 — September 2020

- Built and maintained full-stack web applications using React + Node.js , focusing on UI scalability and API stability.
- Developed RESTful APIs and SQL-based backend logic for CRM systems.
- Worked with Dockerized CI/CD pipelines and conducted QA automation testing.
- Partnered with design teams to enhance UX for enterprise dashboards.

Notable Projects

SquadBrain – Multi-Tenant RAG Knowledge Hub

- Built a Next.js + React knowledge-sharing system for teams, integrating real-time collaboration and AI-powered summaries.
- Implemented modular backend APIs in FastAPI + PostgreSQL, supporting async data workflows.
- Set up Docker-based CI/CD pipelines for multi-environment deployment

ADA – Connected Vehicle Platform

- Developed microservices and UI dashboards using React, FastAPI, and PostgreSQL for real-time data analytics.
- Implemented server monitoring with Grafana and optimized response latency.

Conserve.AI – Energy Management System

- Designed and developed a SaaS analytics system using React, TypeScript, Node.js, and PostgreSQL.
- Integrated caching with Redis and automated API testing with Copilot.

Leadmirror – Marketing AI Tool

- Platform for SEO optimization, lead generation, and keyword scraping.
- Implemented backend (Python/Django, Node.js, PostgreSQL) and frontend (React) with dashboards for campaign analytics.

🎓 EDUCATION

B.E. Electrical & Electronics Engineering, RNS Institute of Technology, Bengaluru

June 2015 — June 2018
