

Rakshith Thubinkere Prakash

Ruppiner Chaussee 211, Berlin, Germany | rakshithgowdatp133@gmail.com | +49 17658730612 | <https://www.linkedin.com/in/rakshith-thubinkere-prakash-157811194/>

Profile

Full-Stack Engineer with 3+ years of experience in designing, developing, and optimizing scalable web applications using JavaScript, TypeScript, React.js, Node.js, Next.js, Python, and SQL. Skilled in building RESTful APIs, integrating CI/CD pipelines, and deploying applications on AWS and GCP. Strong focus on clean architecture, performance optimization, and delivering reliable, user-centric products within Agile environments.

Professional Experience

Software Engineer, Carelon Global Solutions, Bangalore

Nov 2020 — Mar 2023

- **Reduced end-to-end page load times by 39%** through frontend performance optimization (lazy loading, React memoization) and backend API query tuning with indexed database queries and Redis caching.
- **Boosted code reliability to 90% unit test coverage** across frontend (Jest, React Testing Library) and backend services (Pytest/Jest + Supertest) ensuring stable deployments.
- **Designed and integrated RESTful APIs** with Node.js/Express and PostgreSQL, implementing pagination, input validation, and rate limiting for secure and performant data access.
- **Improved authentication & security** by implementing OAuth2 / JWT-based authentication, role-based access control (RBAC), and secure session handling across microservices.
- **Accelerated deployment cycles by 40%** via CI/CD pipelines (GitHub Actions, Docker, AWS Lambda, and GCP Cloud Run) with automated testing, linting, and environment-specific rollouts.
- **Enhanced scalability and observability** by containerizing services with Docker, setting up monitoring using AWS CloudWatch and OpenTelemetry, and configuring auto-scaling policies.
- **Collaborated in bi-weekly Agile sprints** with designers and backend engineers to plan, review, and deliver healthcare features for a high-traffic patient portal.
- **Mentored 4+** junior developers and led cross-team refactoring initiatives that improved code maintainability and accelerated feature delivery by 15%.

Associate Software Engineer, Legato Health Technologies, Bangalore

Dec 2019 — Nov 2020

- Delivered a **COVID-response web platform** using React within 6 weeks, ensuring rapid deployment during critical timelines.
- **Resolved over 600 production defects** in a React-based web platform using HTML, CSS, JavaScript, and Tailwind.
- Contributed to improving **frontend stability by 25%** through systematic debugging and UI fixes.
- Collaborated in an **Agile team** to deliver production-grade UI features using Git-based version control and CI practices.

Education

Master in Data Analytics, University for Creative Arts, Berlin

Mar 2023 — Sep 2024

Relevant coursework: Python, Machine Learning, Power BI, MYSQL, SQL (wrote Optimized SQL queries for analytics.)

Bachelor of Engineering in Computer Science and Engineering, Visvesvaraya Technological University, Bengaluru

Aug 2015 — Jul 2019

Relevant coursework: Java, C, C++, JavaScript, Data Structures and Algorithm.

Skills

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Jest, React Testing Library

Backend: Node.js, Express.js, FastAPI, REST APIs, CI/CD, Docker, Kubernetes

Cloud: AWS, GCP, Firebase, Cloud Run, Lambda, OpenTelemetry

Database: PostgreSQL, MySQL, MongoDB, ChromaDB, VectorDB, Redis

AI / ML: Python, Generative AI, PyTorch, Keras, RAG, LLM APIs

Others: Git, GitHub Actions, Agile, OAuth2, RBAC, A/B Testing, Power BI

Projects

Multi-Tenant RAG Knowledge Hub (*SquadBrain*)

Sep 2025 – Present

https://github.com/rakshithsherlocked/squad_brain

Built a **multi-tenant knowledge platform** unifying GitHub and Jira content with real-time RFC editing using **CRDTs (Yjs)**.

- Developed a **Next.js frontend** with **NextAuth** and router-based routing for secure multi-tenant access.
- Engineered a **FastAPI backend** supporting modular RAG pipelines and external API integrations.
- Integrated **VectorDB + ChromaDB** for semantic retrieval and implemented **OAuth SSO**, observability via **OpenTelemetry**, and analytics dashboards.

Tech Stack: Next.js, NextAuth, FastAPI, ChromaDB, VectorDB, Kubernetes, OpenTelemetry, OAuth2

AI-Powered Movie Recommendation SaaS App(*Netflix-GPT*)

Jan 2025 – Mar 2025

<https://github.com/rakshithsherlocked/Netflix-gpt>

Developed an **AI-powered web app** using **OpenAI GPT APIs** to generate personalized movie recommendations.

- Designed and optimized **Firebase Firestore schemas** for scalable user data and watch history.
- Implemented **RESTful APIs with Firebase Cloud Functions** and **Firebase Authentication** (Email/Google sign-in).
- Built a **responsive React + Tailwind** frontend with dashboards and client-side caching improving load time by 30%.

Tech Stack: React, Tailwind CSS, Firebase, Cloud Functions, OpenAI GPT APIs

YouTube Clone

Sep 2024 – Nov 2024

<https://github.com/rakshithsherlocked/youTube>

Built a **responsive YouTube clone** using **React.js**, **Redux Toolkit**, **Tailwind CSS**, and **REST APIs**.

- Implemented **search, video playback, and dynamic routing** for a real YouTube-like experience.
- Developed **reusable UI components** to improve scalability and maintainability.
- Ensured reliability via **unit testing (Jest)** and optimized API performance.

Tech Stack: React.js, Redux Toolkit, Tailwind CSS, Jest, REST APIs
